KitchenAid Cook Processor

Why own different appliances when you have one with 12 functions?

Boasting enough multi-functionality to process entire dishes, the KitchenAid Cook Processor is an intelligent and versatile all-in-one appliance set to revolutionise your kitchen. The Cook Processor does everything from boiling, frying, steaming, stewing and making dough, to chopping, mincing, pureeing, mixing, emulsifying, whipping and stirring.

The KitchenAid Cook Processor features 6 automatic cooking modes that guide you step-by-step through recipes for delicious preparations. Additionally, you can use manual mode to experiment with new recipes or make cold preparations.

Last but not least, your Cookbook App will regularly provide you with new ideas, so you can keep on serving mouth-watering meals time after time.

High Power. High Style. Low Effort.

Whether you're looking for healthy, decadent, basic or experimental, simply select a program, hit the button, and walk away. No pulling out from under the counters, no using a tamper, no holding down the lid.

Magnetic Drive Technology with MagnaLock System

Our revolutionary Magnetic Drive technology securely locks the jug in place and propels the blades for powerful hands-free blending. You can even feel free to multi-task as it blends. The jug slides in and out to create a low-profile design.

Diamond Blending System

The diamond blending system ensures that all ingredients blend together quickly and efficiently. A robust motor, unique one-piece, BPA-Free diamond jug stainless steel blades and electronic controls combine to create a powerful vortex that is fast and thorough for exceptional blending results.
